

**We're Extraordinary
People Who Create
Lasting Impressions.**

It doesn't take long for our clients and candidates to realize we are truly invested in their future.

For over three decades, Allied Resources Technical Consultants has been supplying human capital within the Energy sector including the electric utility, power generation, oil & gas, and chemical markets.

With multiple offices in the Mid-Atlantic, we have the bandwidth to provide solutions nationally and the ability to ramp up for large projects quickly.

The services provided by our team are considered specialized to the businesses we serve. Our clients choose us because we can provide skilled technical professionals, armed with expertise in niche areas.

Whether you have project-based needs or an empty seat that needs to be filled, partner with Allied Resources and take the stress out of growth!

Industries We Support

Electric Utility

We built and grew our engineering and technical business by supporting nuclear & fossil generation, transmission & distribution, and alternative energy clients nationwide. Our team is focused on providing skilled professionals within specific niche disciplines; ensuring that our clients have the resources necessary to complete critical projects within budget.

Oil & Gas

Allied Resources supports clientele in the Pipeline, Terminal, Refining, and Chemical Manufacturing verticals. Oil & Gas professionals trust us because we provide expertise in a rapidly fluctuating industry and comprehensive insight into the national and regional marketplaces, which is unmatched by our competition. Our team tailors our services to each individual candidate or client while continually utilizing our network and industry intelligence.

Construction & Infrastructure

Construction is a complex industry and recruiting construction professionals requires a thorough understanding of each specialized area of expertise. Leave it to Allied—we've spent decades building our network and have assisted thousands of construction professionals in growing their careers. The right job with the right client can change a candidate's future, and the perfect candidate at the right time can change your company's future. Allied Resources specializes in Municipal, Commercial, Industrial, Water / Wastewater, and Heavy Civil Infrastructure.

We've spent the last two decades building relationships with the finest engineering professionals across the nation.

Simultaneously, we've partnered with state of the art vendors who provide our recruitment team with the tools necessary to continue building a world class network. Why is this important? Because we feel our clients and candidates deserve to have an experience that is a clear cut above the rest.
