

The Right People. The Right Fit.

For over 30 years, Allied Resources Technical Consultants (ARTC) has been the go-to staffing partner for engineering firms looking to build high-performing teams. With a deep network of experienced professionals and a flexible, client-first approach, we deliver specialized talent to support your most critical projects.

Design & Engineering

Mechanical, Electrical, Civil, Structural, and Process Engineers

Project Management

Engineering PMs, Project Controls, Estimators, and Schedulers

Field & Technical Experts

CAD Designers, Drafters, Field Inspectors, and QA/QC Specialists

Construction & Maintenance

Turnaround Specialists, Maintenance Engineers, and Construction Managers

Direct Hire

We connect you with top talent that fits your goals, culture, and long-term needs—helping you build a strong, lasting team.

Contract-to-Hire

Evaluate a candidate's fit before committing long-term, ensuring a smooth transition from contract to full-time hire.

Contract Staffing

Get specialized talent on demand with flexible short- and long-term staffing solutions—without the overhead of full-time hires.

Project Solutions

We provide the workforce and expertise to keep your projects on track—delivering efficiency, compliance, and successful execution.

Delivering Top Engineering Talent Across Critical Sectors

At ARTC, we specialize in connecting engineering and technical professionals with the industries that keep our world moving. With a deep talent network and decades of experience, we provide customized workforce solutions that help companies innovate, build, and maintain infrastructure, energy systems, manufacturing operations, and technology networks.

SPECIALIZED SKILLSETS

Electric Utilities:

- Electrical & Transmission Engineers
- Protection & Controls Specialists
- Project Managers & Field Engineers
- Distribution & Substation Engineers

Renewables:

- Solar & Wind Energy Engineers
- Grid Modernization Specialists
- Battery Storage & Microgrid Experts
- Environmental Compliance/Permitting

Civil Infrastructure & Transportation:

- Civil & Structural Engineers
- Transportation & Traffic Engineers
- Environmental & Geotechnical Specialists
- Construction Management

Commercial & Industrial Facilities:

- Construction Managers & Site Supt.
- MEP Engineers
- Project Controls, Estimators & Schedulers
- CAD Designers & BIM Specialists

Life Sciences:

- Process & Validation Engineers
- Quality Assurance & Regulatory Experts
- Facility Design & Commissioning Engineers
- Manufacturing & Automation Specialists

Data Centers & Network Infrastructure

- Network Engineers & IT Infrastructure
- Fiber Optic & Structured Cabling Experts
- Facility Operations & Maintenance Specialists

Oil and Gas

- Process & Mechanical Engineers
- Pipeline Integrity & Inspection Specialists
- Construction & Turnaround Managers
- SCADA & Automation Experts

INDUSTRIES WE SERVE

ELECTRIC UTILITIES

We support utilities, power producers, and energy infrastructure firms with highly skilled engineers and technical professionals who design, maintain, and enhance the electrical grid and power systems.

RENEWABLES

As the energy transition accelerates, we connect top-tier professionals with solar, wind, battery storage, and emerging renewable technologies to drive sustainable solutions.

CIVIL INFRASTRUCTURE & TRANSPORTATION

From roadways and bridges to rail systems and water infrastructure, we support civil engineering firms and contractors in delivering critical infrastructure projects.

COMMERCIAL & INDUSTRIAL FACILITIES

We provide technical expertise for large-scale commercial developments, industrial facilities, and high-performance building projects.

LIFE SCIENCES

We provide engineering, validation, and compliance specialists who support the pharmaceutical, biotechnology, and medical device industries in bringing innovative products to market.

DATA CENTERS & NETWORK INFRASTRUCTURE

With the increasing demand for mission-critical facilities and advanced network solutions, we deliver professionals who support data center development, cloud computing, and telecom infrastructure.

OIL AND GAS

From upstream exploration to downstream refining, we supply technical experts who ensure safety, compliance, and operational efficiency in oil, gas, and pipeline.
